## JAVASCRIPT API

All events are described in more detail at [developer.longtailvideo.com/trac/wiki/FlashAPI](http://developer.longtailvideo.com/trac/wiki/FlashAPI)

Get variables:

```
getConfig()
getPlaylist()
getPluginConfig(name)
```

(Un)subscribe to events:

```
addModelListener(event,function)
removeModelListener(event,function)
addControllerListener(event,function)
removeControllerListener(event,function)
```

Send (View) events:

```
sendEvent(event,value)
```

Get plugin (only for actionsript:

```
getPlugin()
```

**playerReady():**

When inited, the player calls a global `playerReady()` javascript function to register itself to the page.

## ARCHITECTURE

The architecture is described in more detail at [developer.longtailvideo.com/trac/wiki/FlashOverview](http://developer.longtailvideo.com/trac/wiki/FlashOverview)
